2025: what changed for partner clinics

AVAILABILITY OF PRIORITY PRODUCTS

Priority medicine demand met by donated supply

80% up from 60%

Donated supply covered 8 in every 10 units of the priority medicine demand clinics recorded, up from 6 in 10.

CONTINUITY OF CARE

Quarters with no stockout of a priority medicine

85% up from 62%

71 of 84 clinic quarters had all six priority medicines in stock the whole time.

CAPACITY TO DELIVER CARE

Malaria tests at 12 supported facilities

+25% 10,300 more

10,300 more malaria tests at the same 12 facilities, counted the same way in both years.

> *"This year I could give them their insulin the day they came. That is what changed for us."*
>
> **Halima, nurse at a partner health centre**

Our donations were one part of these results, alongside clinics, their staff and local partners.

From partner clinics' own records, 2024 and 2025
