

Measuring for Success

A PROGRAM OF PQMD

A toolkit for monitoring and evaluation specific to donated medical products.

How do we know medical product donations are making a difference? The PQMD Measuring for Success (MFS) Toolkit is an online resource dedicated to building Monitoring and Evaluation (M&E) capacity in the spirit of advancing the quality, effectiveness and availability of product donations for health development.

Access online, interactive tools, templates and insight to address key elements of M&E strategy specific to medical product donation programs.
